

NETGEAR®

STOP

WINDOWS XP USERS PLEASE READ!!

Hardware installation

 The software you are installing for this NETGEAR product hardware has not passed Windows Logo testing to verify its compatibility with Windows XP.

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.

If you are using the WINDOWS XP Operating System, you will see the warning box to the left come up during the device driver installation process. **PLEASE CLICK THE CONTINUE ANYWAY BUTTON!** Our drivers have been tested thoroughly, and work with the operating system perfectly.

Our drivers are currently undergoing Microsoft's driver approval process (WHQL certification), and upon completion of this process, they will be digitally signed thereby removing this warning screen in the future!!

Thank you for your purchase!!
