Troubleshooting

• If controller is not responding, remove batteries and reinsert batteries. Then power on. If it is still not responding, replace batteries.

• If controller fails to change modes, restart controller and try again.

• Low batteries can cause the 360° Rocker to lose sensitivity or malfunction. Replace batteries if this occurs.

• If the controller cannot be found while pairing, turn Bluetooth® off and back on. Restarting your device and the controller may help.
